

Type	Name	Severity	Location			
JS	h3 CRLF injection attack possible	Critical	agentxploit			
JS	lodash Attacker can inject own code to run	Critical	agentxploit			
JS	axios Potential server-side request forgery (SSRF)	Critical	agentxploit			
JS	hono Attacker can abuse improper encoded URL handling	Critical	agentxploit			
OS	Next.js version no longer receiving security updates No more updates since 6 months	Critical	agentxploit			
PY	pillow Attacker can trigger memory corruption leading to crash or RCE	Critical	agentxploit			
PY	aiohttp HTTP request/response splitting attack possible	Critical	agentxploit			
{ TS }	Potential file inclusion attack via reading file in daemon.ts	High	agentxploit			
JS	socket.io-parser Attacker can abuse missing input validation	High	agentxploit			
PY	pyjwt Insufficient verification of data authenticity	High	agentxploit			
PY	cryptography DoS or RCE possible due to NULL pointer dereference	High	agentxploit			

JS	Next.js Attacker can trigger DOS-attack	 High	agentxploit oitor			
{ GH }	3rd party Github Actions should be pinned in ci.yml	 High	agentxploit oitor			
JS	follow-redirects Accidental exposure of sensitive info possible	 Medium	agentxploit oitor			
PY	pytest	 Medium	agentxploit oitor			
{ PY }	Potential file inclusion attack via reading file in analyzers.py, worker.py and 1 others	 Medium	agentxploit oitor			
JS	bn.js Attacker can trigger DOS via infinite loop	 Medium	agentxploit oitor			
JS	pino Abuse of JavaScript's prototype API possible (Prototype Pollution)	 Medium	agentxploit oitor			
PY	ariadne External code executed without integrity check	 Low	agentxploit oitor
